1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

which is the system of equations of the theory of the motion of a rigid body. The system of equations is written in the form of a set of ordinary differential equations.

2. The second part of the paper is devoted to a detailed analysis of the problem of the existence of solutions of the system of equations

which is the system of equations of the theory of the motion of a rigid body. The system of equations is written in the form of a set of ordinary differential equations.
